length rolls  
available

**48"**  
roll width

### Experience the difference

#### DAX® WITH JERSEY SCRIM

Best-in-class seating foam, designed with comfort, quality, safety and durability in mind.

- Meets flammability performance certifications
  - Passes 14 CFR 25.853(a) 12-Second Vertical burn test
- Shown to improve flammability performance
- Customized comfort that retains its durability characteristics
- Smooth, wrinkle-free appearance and user-friendly dress cover application

The superior properties  
of DAX® foam make it  
the ultimate low-risk,  
high-quality seating  
material.

### Highly engineered solutions **READY FOR TAKEOFF**

Skandia's smart engineering and quality manufacturing have made Skandia the aviation industry's trusted source for innovative products, engineering, and certification expertise since 1983.

# The respected aerospace seating partner for **QUALITY, COMFORT, EXPERTISE**

## THE ULTIMATE LOW-RISK, HIGH-QUALITY SEATING SOLUTION

### **QUALITY:** Skandia products & services stand apart

- Solutions that are consistent, precise and repeatable
- Unmatched firehard properties
- Superior durability

### **COMFORT:** Skandia improves aircraft experience

- Making aircraft quieter, safer and more comfortable
- Best-in-class physical properties
- Providing superior levels of comfort

### **EXPERTISE:** Skandia delivers on its promises

- Expertise in design, engineering and certification
- Focused solely on aerospace
- Skandia maintains its own team of in-house DERs and DARs

### **VALUE:** Skandia means low risk, high value

- Partnering with an aerospace solutions expert ensures risk is managed and mitigated
- Our aviation industry knowledge provides value added services
